

TranzCom

Secure group communication tool available free of charge for public health organizations!

Anderlecht, 1 April 2020 - During this critical period of health crisis, **TranzCom** Telecom offers its secure communication and crisis management solution free of charge to healthcare organisations for three months. The benefit is that medical staff, emergency services and all other stakeholders are able to communicate with each other and coordinate their actions in real time, in order to better manage this crisis situation.

What is available to all stakeholders:

- **A private directory, in which all medical personnel are grouped, managed and made available by the administrator of the organization**
- **Secure communication, individually or in a group (VoIP, Push-to-Talk, video and data)**
- **For configured Push-to-Talk communication channels**
- **Virtual Crisis Command Centre**
- **Emergency alerts and geolocation**

A quick and easy implementation that requires no specific equipment (own smartphone and WIFI connection, 3G or 4G). We invite any interested organization to contact us at the following address: **info@tranzcom.com**
