ENERGY DISTRIBUTION

TranzCom is a producer and integrator of electrical equipment that offers turn-key solutions. We serve the energy, power and utilities markets with a comprehensive range of products and solutions in the field of medium and low voltage. We provide state-of-the-art solutions and also propose cost-effective maintenance services that protect the long-term value of your equipment.

Railway Energy

TranzCom Energy has vast experience in delivering **traction substations** to public transport companies (railroads, trams, metros). We deliver **turn-key solutions** that meet the requirements of the most demanding customers. Our team of experienced engineers can assist you in finding the most appropriate technical solution at any time.

Industrial Storage

Our distribution of the SAFT products provides reliable power back-up batteries specifically required by the **following market segments**:

- ✓ Aviation
- ✓ Rail & Mass Transit
- ✓ Marine
- ✓ Military
- ✓ Telecommunication
- ✓ Building & Industrial Plants

These industrial batteries have a **very high level of reliability** and their **trouble-free operation** significantly reduces their total life cycling cost.

Industrial Applications

TranzCom Energy provides a comprehensive **range of products**, systems and services covering the needs of **industrial, commercial and utility customers**. We rely on industry-leading partners such as [AEG Power Solutions](#), [ABB](#) and [MR](#) for all industrial power requirements.

Your project from A to Z

From briefing until order, we take care of everything to design the most appropriate solution covering your needs. Our mission is to offer you top quality solutions with an outstanding service.
