TELECOMMUNICATION

The mission of TranzCom Telecom is to secure life and processes through reliable, secure and flexible communication solutions. Our solutions enable your team members to be operational and connected anytime, anywhere - regardless of the device and network. Whether Push-to-Talk or unified communication, we offer you the latest technological advances. Whether it's voice communication, video transmission, geolocation, data transmission or scheduling, we integrate communication into your operational missions, your business processes and applications.

Critical Communication

We are proud to be the **market leader** in Radio Network Infrastructure and radio terminals (TETRA/DMR/PTT over LTE) in Belgium. Our expertise spans more than 30 years. We have sold more than 40,000 ASTRID radios and have provided more than 50 radio networks to public transport, airports, government agencies, industry, and utilities. Our Broadband Push-to-Talk solutions extend your coverage through WIFI, 3G, 4G, LTE, ... We integrate the best-in-class HD video encoders and body-worn cameras with streaming capabilities in your [critical communication](#) processes.

Unified Communication

The way people communicate has changed dramatically in recent years. The number of communication channels such as **voice, chat, video, apps and file sharing** has grown, and so has the number of devices with which we communicate. Our solutions give your employees a single app for calling, messaging, meetings and team collaboration – all with the same ease-of-use they get from their personal apps. We deliver [unified communications solutions](#) the way you need it – on premise or private, public or hybrid cloud.

Public Transport Embarked Equipment

TranzCom Telecom has designed **universal telecommunication embarked equipment** (DMR/TETRA/LTE) and smart intercoms (Public Address) designed for voice and data communication installed in the cabins of metros, trams, trains and buses. More than 10,000 vehicles are already equipped with our smart mobile communication and audio management.
