PUBLIC TRANSPORT EMBARKED EQUIPMENT

TranzCom Telecom has designed universal telecommunication on-board equipment (DMR/TETRA/LTE) and smart intercoms (Public Address), specifically for voice and data communication-installed metros, trams, trains and buses.

Our solutions enable high quality and reliable voice communication between drivers, passengers and control centres. They also enable the reception and transmission of various data, such as alarms from/to management servers and external systems. More than 10,000 vehicles are already equipped with TranzCom smart mobile communication and audio management.

TETRA/DMR/LTE Communication Module & Audio Management

- ✓ EN 50155 & UNECE 10
- ✓ LTE, Tetra, DMR on-board communication module
- ✓ Dual-mode communication (Radio, LTE)
- ✓ Centralised Audio & Communication Management System (PA, PIS, IC)

Smart Intercom

- ✓ EN 50155 & UNECE 10

TELECOMMUNICATION

Critical Communication

Unified Communication

- ✓ VoIP communication module, noise cancelling, simple and secure passengers interface, small size, low power

TETRA/DMR/LTE COMMUNICATION MODULE & AUDIO MANAGEMENT

SMART INTERCOM
